REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: Although the prior art recognizes the polymerization of olefins using Zirconium catalysts that include those in Appellants' claims, and blends of polyolefins of different molecular weights are also known, the blend of polymers as claimed with the polymerization done with the specific catalysts required is not suggested, nor is the fact of improved properties in the product blends taught. Appellants' claims are, therefore, both novel and unobvious over the closest prior art as cited.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
